Subject: Guidance document regarding Lab Testing for the detection of COVID-19 cases.

With reference to the subject cited above,

2. As you all aware that to detect the COVID-19 in the population , the tests can be divided in two main categories:

- a) Molecular Testing : Tests that will detect the presence of the Virus, and
- b) Serological Tests: Tests that can detect the immune response to the virus.

3. **Use of Rapid Antigen Detection Kit for COVID-19:-** In continuation to letter No.3857-3882 dated 25-06-2020 you were directed to use Rapid Antigen Detection Kits to strengthen the testing capacity for Early Diagnosis and Management of the positive cases. It is once again reiterated that:-

- (i) That Rapid Antigen may be used in combination with RTPCR. The TOTs of all the districts regarding Rapid Antigen kit has already been conducted in two batches at State Headquarter.
- (ii) The categories where the kit has to be used are annexed at **Annexure-I**.
- (iii) Line Listing of ILI Cases and Symptomatic Pneumonia Cases with Breathing Problems identified by ASHA during rounds 1 to 3 for COVID-19 Survey is being shared with you (**Annexure-II**) for followup and active surveillance.
- (iv) It is once again emphasized that if sampling is required in dead-body due to suspected COVID-19 death the Antigen Rapid kit may be used for the same.
- (v) All data of testing needs to be entered into the ICMR Portal on a real time basis. Password/Login IDs has already been issued to each District.
- (vi) Districts need to establish Antigen Testing Centres immediately with the point of care approach.
- (vii) The distribution of kits for NCR Districts are as follows:
